Subject: Aquila draft letter
Attachments: Draft clarification letter.docx

Hello all

As we discussed several weeks ago, to resolve on-going questions regarding some conditions in the Aquila permit, I've drafted the attached letter which attempts to clarify those conditions by explaining the intent of the conditions or sections of the permit. I've attempted to be clear that we are not modifying any permit conditions. Please review the attached draft, and share your comments.

I have not shared this with Aquila yet, however, I have discussed several items with them. Just so you know, they are moving forward with some aspects of the permit requirements even without this letter. They have marked the wetland boundaries, installed wetland monitoring wells, established the vegetation monitoring plots, and collected much of the baseline wetland data. They are also working on the groundwater modelling plan (they haven't shared that with us I've just been told it's in the works). If you view this letter as an acceptable clarification, then I will share it with them.

Please let me know if you have any questions, and thanks for your help.
